

Transform Your Horse!

From Blue...

To Bounce!

With Angela Davison's unique hair testing system, individual feed ratings guide and specifically tailored herbal mixtures.

Angela Davison was one of Australia's first female jockeys. Working with some of the greats – T J Smith, John Drennan and Neville Begg, Angela had the chance to become involved with, and ride, some fabulous horses like Kingston Town, Mighty Kingdom, Imposing and later, the great mare Emancipation.

366 winners later Angela realised it was time to give something back to the horses. She had always relied on Herbal Medicine and quality bodywork to accelerate her recovery from the inevitable injuries and was convinced that they could be used similarly to treat horses, particularly where orthodox veterinary regimes could not find the key.

Angela graduated from the Dorothy Hall College of Herbal Medicine (Sydney) in 1987, studied Craniosacral Therapy with the Upledger Institute, Florida in 1991 and 1992, and the Clinical Science of Mineral Therapy with Blackmores in 1993. She has been an EMRT (Equine Muscle Release Therapy) practitioner since 1998. Angela developed her own unique hair testing technique in 1991, which forms the foundation of her exceptional work in healing horses and continues to evolve as she allows every horse to be her teacher. Her work represents the culmination of all her years of learning from horses and herbs and she has become a powerful catalyst - helping horses heal and move past their blocks and limitations to realise their full potential in performance and enjoyment of life.

It doesn't matter where you or your horse are located, The Horse Herbalist's unique hair testing technology allows individual treatment from a distance.

This is what you do:

Simply cut or pull a switch of hair from the horse's mane and drop it IMMEDIATELY into an envelope clearly labelled with the horse's full name, your name and the date. Please do not handle hair more than is absolutely necessary.

On a separate piece of paper, please list:

- Owner/Trainer's name, address, business hours phone number, home phone number, email address etc
- Horse's stable name, sex, age, breed, discipline (ie race, campdraft, dressage etc)
- Horse's perceived problem, veterinary diagnosis and treatment if any. Any of your own observations & horse history, if known
- Everything the horse is eating, including all additives

Hair samples will not be processed unless the above is fully complied with. Cheque or Money Order MUST accompany hair sample (for latest prices, please go to www.thehorseherbalist.com or call (02) 6686 5934 and listen to the recorded message.)

MAIL TO:

The Horse Herbalist, PO Box 161, Ballina, NSW, 2478

Please note that Hair Testing is an extensive individual process designed to investigate and uncover all imbalances (not to be confused with chemical hair analysis). Please allow up to FOUR WEEKS from the time you mail the sample, to scheduling of the verbal report and over-the-phone consult. If your horse has a genuine health emergency, please ask to be fast-tracked.

A combination of Herbal Extracts and Flower Remedies are given over a 6 week period. Positive changes are expected to be seen from mid to latter end of initial treatment. Re-assessment with another hair sample at the end of Week 5 of treatment is crucial, as 50-75% of the re-balancing of the horse will be achieved with the first formula, but the second (different) formula will complete the process. 95% of horses treated in this manner are back in balance after 12 weeks and will keep improving as long as dietary recommendations are adhered to. We get in, get the job done and get out of your way! We ask that you commit fully to the process.

Your Horse's Health is Our Business!
